SPRINGFIT™ MASK

INTEGRATED STRUCTURAL COMFORT

The NEW SpringFit™ fold flat disposable mask achieves an unrivaled secure fit with the use of a unique endoskeleton structure. SpringFit™ introduces an abundance of features that maximize fit, comfort, compatibility and performance.

SPRINGFIT™

✓ ENDOSKELETON

The internal skeleton frame guarantees that each mask keeps its shape, increasing performance and maintaining rigidity. The integrated spring feature absorbs facial movements ensuring a secure face fit and seal.

✓ COMFORT

The welded nose piece gives a tighter fit and minimizes irritation. The adjustable strap means that SpringFit™ can be fitted comfortably to all head sizes and shapes. A foam area around the inside of the mask provides a comfortable fit.

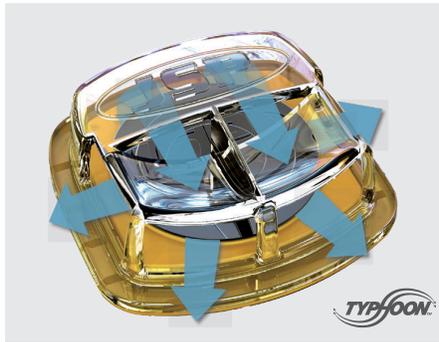

✓ COMPATIBILITY AND VISION

The low profile design of the SpringFit™ provides exceptional compatibility with other above the neck PPE, such as eyewear. The low profile also offers an improved field of vision for the wearer.

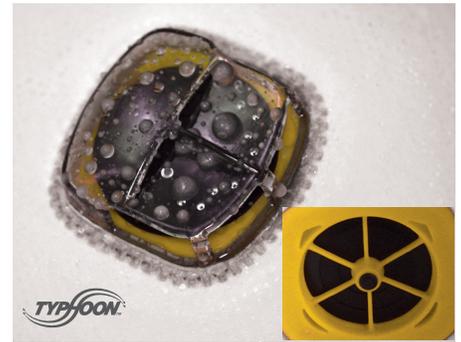

✓ COMPACT

The fold-flat design makes SpringFit™ more compact, and easily pocketed. SpringFit™ is also individually packed to ensure a high level of hygiene.

✓ TYPHOON™ VALVE

The unique Typhoon™ valve has been designed to reduce breathing resistance, heat and moisture build-up.

✓ PERFORMANCE

Silicone valve is unaffected by any moisture, and therefore can be used with the same performance under very low temperatures, tested at -40°F.
