PUMA® Safety

Charge Orange LOW S1P ESD HRO SRC
Composite Toe Electrostatic Dissipative Shoes,
Heat Resistant, Slip Resistant, Safety Boots

- RUBBER SOLE MOTION - The unique waffle pattern rubber sole guarantees maximum slip resistance (SR or SRC) and helps facilitate self cleaning (mud release). Additionally, offering heat resistance up to 300°C (HRO) for ultimate underfoot protection and safety.
- IMPULSE.FOAM MIDSOLE - The intelligent midsole made of IMPULSE.FOAM® reacts to every step with an energy impulse. As a result, the IMPULSE.FOAM® not only returns up to 55% of the energy, but also ensures maximum cushioning, excellent stability and long-lasting comfort.
- POWER PLATE - Due to its shape and material, the POWER PLATE brings a unique torsion control system to the safety shoes. It enhances stability of the entire foot, increases the energy return effect of the IMPULSE.FOAM® midsole and supports the natural rolling motion of the foot.
- FAP®LITE - FLEXIBLE ANTI-PERFORATION - The latest generation of metal-free perforation protections.
- EVERCUSHION® CUSTOM FIT MID - The breathable, moisture-regulating, anatomically shaped insole cushions optimally with every step. The specially coordinated arch support enables the foot to be positioned naturally in the shoe and stimulates the muscles when walking.
