Care Instructions

Hand Wash

PUMA® Safety

Fuse Motion 2.0 Red LOW S1P ESD HRO SRC Composite Toe Electrostatic Dissipative Shoes, Heat Resistant, Slip Resistant, Safety Boots

- **RUBBER SOLE MOTION** - The 300°C heat resistant HRO rubber outsole is inspired by the latest running shoe technology. The anti-slip sole profile with its diagonal flex grooves ensures optimum flexibility and maximum traction (SRC).
- **IMPULSE.FOAM MIDSOLE** - The intelligent midsole made of IMPULSE.FOAM® reacts to every step with an energy impulse. As a result, the IMPULSE.FOAM® not only returns up to 55% of the energy, but also ensures maximum cushioning, excellent stability and longlasting comfort.
- **TORSION CONTROL ELEMENT** - The TPU torsion control element in the middle of the sole supports the natural flexing action of the foot while walking and provides a better support and stability for the feet.
- **FAP® - FLEXIBLE ANTI-PERFORATION** - The flexible anti-perforation midsole made from para-aramid synthetic fibres offers ultimate protection of the foot from sharp penetrating objects.
- **EVERCUSHION® BA** - The open-cell polyurethane foam, combined with a moisture wicking and antibacterial fabric covering, ensures the ultimate climate control and general pleasant environment for the foot. As per all evercushion® footbeds, this offers permanent and long lasting cushioning through its special rebound properties.
