ASTM F2413 Requirement

Care Instructions

Albatros®

Aer55 Impulse Black Blue QI LOW S1P ESD HRO SRA Composite Toe Electrostatic Dissipative Shoes, Heat Resistant, Slip Resistant, Safety Boots

- DUAL IMPULSE SLIP RESISTANT OUTSOLE The easy to clean rubber outsole ensures perfect ground contact. It is non-slip and abrasion resistant as well as heat resistant up to 300°C (HRO). The specially designed cleat profile and the wide flex grooves guarantee optimum flexion, optimize the water-displacing properties (windscreen wiper effect) and provide firm grip on a wide variety of grounds.
- IMPULSE.FOAM® midsole Ultimate comfort during long working days. The innovative IMPULSE.FOAM® midsole in two different densities reacts to each of your steps with an energy impulse. Thereby the IMPULSE.FOAM® does not only return the energy, but also provides maximum cushioning and excellent stability.
- comfit® AIR FOOTBED The newly developed, breathable
 ALBATROS® comfit® AIR footbed has elevations in the heel and ball
 area of the foot as well as a support of the longitudinal arch. This
 helps the foot keeping its natural position in the shoe and stimulates
 the musculature while walking. The slip-resistant textile cover is
 odour-resistant, moisture absorbing and washable at 30°C.
- FAP* Flexible Anti Perforation The flexible anti-perforation midsole made of ceramic-coated fibers, reliably protects the feet completely from penetrating objects.
