## Performance Data

ASTM F2413 Requirement

## PUMA® Safety SHIFT BLUE LOW S1PS FO HRO SR

- MOTION CORE SOLE Heat resistant up to 300°C, the tread on the rubber outsole delivers perfect contact on a wide variety of surfaces

   strong traction thanks to flatter studs for indoor use, but also selfcleaning with greater depth for outdoor suitability. The lateral elevation of the midsole in the heel area, which is frequently used in running, improves the stability of heel contact.
- CUSHIONING MIDSOLE A soft PU midsole optimally cushions the high forces with every step and delivers the ideal combination of stability and flexibility.
- FAP\* LITE FLEXIBLE ANTI-PERFORATION The latest generation of metal-free antiperforation: • 50% lighter\* • excellent flexibility • improved cushioning and pressure elasticity • breathability and sweat absorption for a cooling effect
- EVERCUSHION® EASY The combination of breathable, open-cell foam technology and particularly moistureabsorbing upper material effectively transports perspiration away from the feet and keeps them pleasantly dry. The soft memory foam of the evercushion® EASY footbed adapts perfectly to the shape of the foot and exhibits truly outstanding cushioning effects – for the softest of touches with every step.
